

LightSpot - Stand-alone precision lighting control by presence detection and photocell

## HC5A Universal Hand-held Controller

The HC5A Universal Hand-held Controller offers the end user temporary on/off override and light level adjustment. In addition, it provides the ability to set and recall up to six different lighting 'scenes'. It is supplied complete with a wall bracket.

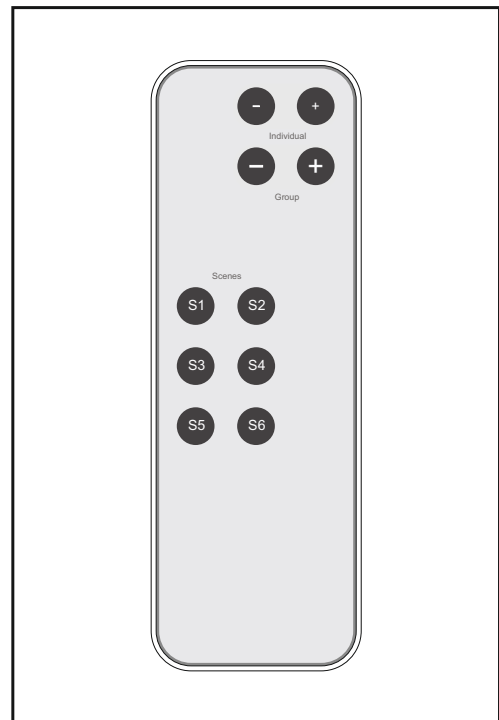

Please see information on individual detectors to check compatibility.

### Operating Instructions

Point the handset at the detector and press a button. The beam angle is quite narrow, so accurate aiming is important.

### Key Assignment

-  S1 - Scene 1, short press to recall, long press to set.
-  S2 - Scene 2, short press to recall, long press to set.
-  S3 - Scene 3, short press to recall, long press to set.
-  S4 - Scene 4, short press to recall, long press to set.
-  S5 - Scene 5, short press to recall, long press to set.
-  S6 - Scene 6, short press to recall, long press to set.
